

Precifarm product line.

EPRA-licensed solar PV and storage, sized for households, SMEs, schools, and institutional sites across Kenya. Every package includes the same five-year EPC and O&M commitment, delivered by the regional engineering team responsible for your area.

SPEC	Starter	Family	Commercial	Commercial Plus EV-READY
Capacity (PV + storage)	550 W · 1.5 kWh	2.2 kWp · 5 kWh	From 2.75 kWp · 15 kWh	50 kWp to 1 MWp · 100 kWh to 2 MWh storage
Best for	Single-room homes, kiosks, renters, boda riders	Two to three bedroom off-grid homes seeking reliable full-day power	Schools, clinics, SMEs, cooperatives, irrigation farms	EV-ready mini-grids, industrial sites, fleets, campuses
Powers	Up to 10 LED bulbs, 1 TV, Wi-Fi router, phone charging, and 1 small fan (8 to 12 hours per day depending on usage).	10 to 20 LED bulbs across the home, 1 energy-efficient fridge, 1 TV, Wi-Fi router, 2 to 3 fans, phone charging, and small appliances (used at different times).	Multi-room lighting systems, refrigeration (clinics and shops), water pumping systems, milling or processing equipment, and productive farm or enterprise loads.	Large facilities, workshops, agro-processing units, cold storage clusters, ICT systems, and EV charging infrastructure (multi-point charging possible).
Irrigation support	Up to 1 acre of irrigation water supply (approximately 10,000 litres per day).	Up to 2 acres of irrigation water supply (approximately 25,000 litres per day).	Designed for 5 to 45 acres depending on site energy requirements and system configuration.	Distributed energy systems, continuous industrial loads, and fleet charging operations at scale.
Daily load	Approximately 0.6 kWh per day. Lights, Wi-Fi, TV, fans, phone charging.	Approximately 5 to 6 kWh per day. Fridge, full LED lighting, entertainment, Wi-Fi, fans, and small appliances.	Approximately 28 kWh per day typical. Cold storage, milling, lodges, clinic loads, irrigation across 5 to 45 acres with pumps up to 3 km from source.	Highly variable by deployment archetype: institutional anchor sites typically run classroom, clinic, and cooperative loads plus 2-4 AC charging points; fleet hubs run continuous DC fast-charge or battery-swap rotations; industrial sites smooth peak draw against grid limits while charging delivery vehicles overnight.
Inverter	1.5 kW hybrid	5 kW hybrid	From 10 kVA, scalable to 12 kW Deye hybrid	Sized per deployment, hybrid configuration
Panels	1 × 550 W	4 × 550 W (expandable)	From 5 × 550 W up to 24 × 550 W	From 90 × 550 W up to ~1,800 × 550 W
Service tier	Standard	Standard	Priority, on-site	Priority, on-site
Starting price	KSh 95,000 cash, or KSh 5,472/month	KSh 290,000 cash	On quotation basis	On quotation basis
Pump caveat	Irrigation pump is not included in the package.	Irrigation pump is not included in the package.	Irrigation pump is not included unless specified in the project scope.	—

ALSO: SOLAR IRRIGATION SYSTEMS

Submersible borehole pumps, surface pumps, and solar pump controllers. Sized from 1-acre smallholder to 100+ acre commercial farms on a site-assessment basis.

ALSO: EPRA T1 / T2 / T3 TRAINING

Practitioner-led short-cohort programmes that prepare technicians and engineers for the EPRA solar PV licence application. Mapped to the NITA competency framework.
